Peace To Far Off Places

© Jenny Lester SOCAN BMI

G C G Uncle Sam you've got the upper hand can you stop the world from crying D In a veil of fears that we shed our tears for the thousands who are dying C G It's been round and round and round in the name of many faces D G Can we change today to make a better way and find peace with far off places

I'm not saying I'm the fearing kind but I believe in praying It don't matter who you're talking to it's the words that you are saying Can we fold our hands try to understand the creeds and all the races Can we change today to make a better way and bring peace to far off places

It's a cold dark that has come our way it is cross the line of evil Does our fabric share the same threads we bare in the actions of some people It's been round and round and round in the name of many faces Can we change today to make a better way bring peace to far off places

Let the bells ring loud or hold your flag up proud at home and across the waters Does the vigil turn while the candles burn to the innocent sons and daughters It's a burning fire, hope and desire the soul of man embraces Can change today to find a better and make peace with far off places

Now uncle Sam you've got the upper hand can you stop the world from crying In the veil of fears that we shed our tears for the thousands who are dying It's been round and round and round in the name of many faces Can we change today to make a better way and find peace with far off places Can we change today to make a better way and find peace with far off places
